The American catch outlide the line has not, as a rule, been large. Many vessels out from four to five weeks have secured small fares, as shown by our boarding books. The American fishermen know now the extent of their privileges, and being aware that the law will be enforced are consequently very careful not to expose themselves to the risk of selzure. It is among this element of the population that the worst revolutionary feelings exist. Large shipments of arms and ammunition have also been made to Honolulu by sailing vessels."

A DISTILLERY CONSOLIDATION PROPOSED. Chicago, June 22 (Special).—A number of promi-nent distillers of the country north and west of the Ohio River are in session here. The meeting was called for the purpose of closing up the ac-Western Export Association, and to consider the formation of a gigantic pool of "Trust," which would effectually control the whiskey and alcohol produc of the country. The design is to establish a Trust of the country. The design is to establish a 'Trust' which will control every distillery in the West, and either to purchase or lease all houses which it may be necessary to close up. Instead of limiting the capacity of the running houses to 33 per cent, each house will run to its full capacity. This, it is claimed, will enable the manufacturers to produce their goods at a reduction of from 7 to 8 cents per gallon below the present ruing prices, and thus materially benefit the trade An executive committee will be appointed which will manage the entire product of the running houses, fix the values of the houses to be closed, pay all dividends, manage all exporting of goods, and, in fact, control the entire business of all the distilleries in the Trust. All the distillers present at the meeting expressed themselves in favor of the Trust, and it was stated that a number of others were willing and anxious to assist in the proposed consolidation.

FEATURES OF THE LABOR PROBLEM.

It was stated yesteriay by the silver manufacturers that several more of the silver-chasers have returned to work. At Tiffany & Co.'s it is said that six chasers are now at work, while in the other shops about the same proportion. The men strenuously deny that they are weakening or that any of them are returning to work. There is likely to be war in District Assembly No. 49

There is likely to be war in District Assembly No. 49 before long. There has been for a long time a growing disaffection in the district at the actions of the administration. The Home Club considered the matter as so serious that a special meeting of that body was held some days ago and it was decided that T. H. McGuire must go back to the district and try to aliay the trouble. Victor Drury, who represents McGuire's local assembly. Was withdrawn and McGuire was sent in his place. What the result of this will be is uncertain. Charges have been preferred against Muster Workman James E. Quinn by George W. Dunne, chairman of the Board of Arbitration, and Quinn in turn has preferred charges against Dunne. The nature of the charges is not known, and the officers of No. 49 refuse to say anything about them.

One of the heaviest rain-storms of the season, accompanied by thunder and lightning, passed over the city vesterday afternoon. The day had been extremely sultry, and although the sky was generally overcast the thermometer marked 80 degrees. The Weather Bureau predicted rain, yet nobody seemed to expect a title of the quantity that came. Few of the matinee goers took their water-proofs and rubbers along, and many neglected to carry even their unbrellas. When the plays were over they came out to find themselves, to their astonishment, in a drenching rain, so suddenly and tempestuously had the storm begun. Streets were summarily flooded, and the gutters failed to carry off the rushing torrents which overleapt the curbing and in many instances inundated the sidewalks and crossings.

Broadway at several points presented the

calculable benefit.

Up to 10 p. m. the rainfall, as officially reported by the Signal Service Bureau in the Equitable Building, was 2.12 inches. The temperature at the beginning of the storm was 73 degrees. At 10 p. m. it had fallen to 67 degrees. This was the thermometer's lowest point for the day, and there was little improvement in oppressiveness of the atmosphere. The probabilities for to-morrow are for more rain, with no change in temperature.

Before parting, however, the young wife drew up the following paper, which was dated June 1, 1887: the following paper, which was dated June 1, 1887;

NEARLY TEN MILLIONS GONE

THE CINCINNATI BANK DISASTER.

OFFICERS AGAIN ARRESTED ON A CHARGE OF COM-SPIRACY-DEPOSITORS LIKELY TO GET NOTH-

INT THE SHAPE TO THE TRIBURE. CINCINNATI, June 22 .- Every hour seems to add

to the magnitude of yesterday's failures and to in-crease the frauds and double dealing which brought them about. The liabilities of the Fidelity Bank and those of E. L. Harper & Co., the Swifts Iron Works and the Riverside rolling mill will reach from \$2,000,000 to \$4,000,000 more, making a total of \$8,000,000 to \$10.000,000. The assets can only be conjectured, but if the

bank depositors get twenty per cent they will be lucky. There is much uncertainty as to the amount which may be realized from stockholders of the bank. It seems that of the \$2,000,000 which the Fidelity boasted of, the latter half had not been authorized, although paid for, and it is a question as to how it is to be treated insettling up the assets. Then it is said that Harper's holdings are mostly in the second million. It it is held that this second million does not exist as stock, there may be more hope for the depositors.

efforts made to get deposits comes to light every hour. Judging by the number heard from, most of the Fidelity's country correspondents who had a balance were systematically swindled. It is said that large quantities of the discounted paper were sent to New-York and rehypothecated there, and that no trace of much of it can now be found by the examiner and receiver.

It is absolutely certain that for some weeks it has been a common thing with the three officers of the bank to urge friends to solicit certain others to keep their account with the Fidelity, with the whispered promise that if the application was successful the parties approached should be "put on the inside of the big wheat deal" as a reward. Every sum of a hundred dollars in sight seemed to be grabbed for. Workingmen with the savings of years were besieged to deposit and they usually succumbed to the blandishments used.

The industry with which this collection of funds was kept up was equalled only by the completeness with which they were swept into the bottomless wheat pit of Chicago. Franklin Alter, a very conservative man formerly connected with the Fidelity, said to-day: "I believe there was never a more thoroughly gutted bank on earth; there will not be a cent left for the depositors."

His opinion is concurred in by other careful men Harper, Baldwin and Hopkins are closely watched for fear they may abscond.

Harper, Baldwin and Hopkins are closely watched for fear they may abscond.

Bank Examiner Eugene Powell has been exceedingly busy all day in the attempt to get a knowledge of the real condition of the Fidelity Bank. He made discoveries which justified him, under the advice of District-Attorney Burnet and Assistant Bruce, to cause the arrest a second time of Harper, Baldwin and Hopkins. This is a new feature of the case, as it consists of a charge of conspiracy to defrand, by issuing on June 14 three drafts of \$100,000 each in favor of Wilshire, Eckert & Co. upon the Chemical National Bank of New-York, signed by B. E. Hopkins, assistant cashier. The charge is conspiring to commit an offence against the laws of the United States by unlawfully and wilfully misapplying the funds and credits of a banking institution, in pursuance of which purpose they issued these drafts.

Another affidavit charges the same persons with a conspiracy to commit an offence against the United States laws by issuing on May 18, "and causing to be transmitted to the Controller of the Currency a false and fraudulent report of the bank at the close of business May 18, 1837, in this that the said bank did not have in its possession as stated in said report, \$630,000 in legal-tender notes and \$226,310 in silver certificates, they knowing these amounts were not there, and making a statement in pusuit of a conspiracy to deceive certain officers of the bank and the agent appointed to examine the afairs of the bank." The arrest was made upon those affidavits, which were sworn to by Mr. Powell, late this afternoon. The prisoners were taken together before United States Commissioner Hooper, where they waived examination and were bound over to appear at the October term of the Court. Mr. Harper gave bonds in the sum of \$15,000 and the other two \$5,000 each.

A publication was made here that Messrs. Swift & Lyman, attorneys for the Exchange National Bank of Chicago, were here to push a claim of \$750,000 against the Fidelity. The truth is that the exac

the Supreme Court, Chambers, yesterday, against the property in this State of the Fidelity National Bank of Cincinnati, at the suit of the National Broadway Bank of this city, to recover \$21,751.25. It is claimed that, between May 31 and June 13, the Broadway Bank sent to the Fidelity National Bank checks and drafts payable in Cincinnati and its vicinity, all upon demand, and by indorsement made payable to the Fidelity National Bank, amounting to \$24,193.29; or this only \$2,408.03 has been paid, and the suit is for the balance. EFFECT OF THE FAILURE IN CHICAGO. CHICAGO, June 22 (Special).—There were reduced offerings of wheat at the opening this morning, the July option commanding 704 cents. The prostration of the Fi-

delity Bank was the subject of much wondering comment In the first hour of trading a feeling of uneasiness per-valed the wheat pit. The July option fell off to 70c., and then to 69 4c. Offerings were heavier, with considerable bank wheat to increase the weight. Receipts of wheat here were 216,176 bushels against shipments of 412,032 bushels. The receipts at Duinth were 15,384 bushels; shipments 298,603 bushels. At 12:15 p. m. July wheat sold at 69 a cents. July wheat closed at 70 cents; July corn, at 36's cents; July lard, at \$6 30; July 1ibs, at \$7 30. The following statement is issued to-night by B. B. De wey, vice-president of the American Exchange National Bank of this city.

"The statement telegraphed to a morning paper from Cincinnati to the effect that this bank has an interest of \$750,000 at the Fidelity National Bank is a gross exageration. Its interest is limited to one draft of \$190,000, drawn on the Chemical National Bank of New-York, which has been protested, and a balance of \$198,365 10 on collection accounts, against which we hold sundry collaterals. Our private assurances are that all drafts and deposits of the Fidelity National Bank will be paid in fulf. The Cincinnati paper responsible for the publication of the statement as to the amount of this bank's claim will correct in to-day's issue." then to 69 4c. Offerings were heavier, with considerable
